Fuji Logistics Co., Ltd.

New Warehouse to Open in Malaysia

Our group company, Fuji Logistics Malaysia, is set to inaugurate a new warehouse, "Kulim Logistics Center 2," in Kulim, Kedah, Malaysia, in January 2026.

This warehouse will be the second facility in the Kulim area, following the "Kulim Logistics Center," which commenced operations in 2012.

As the only Japanese logistics company within the Kulim Hi-Tech Park, Fuji Logistics Malaysia has over 10 years of experience handling semiconductors.

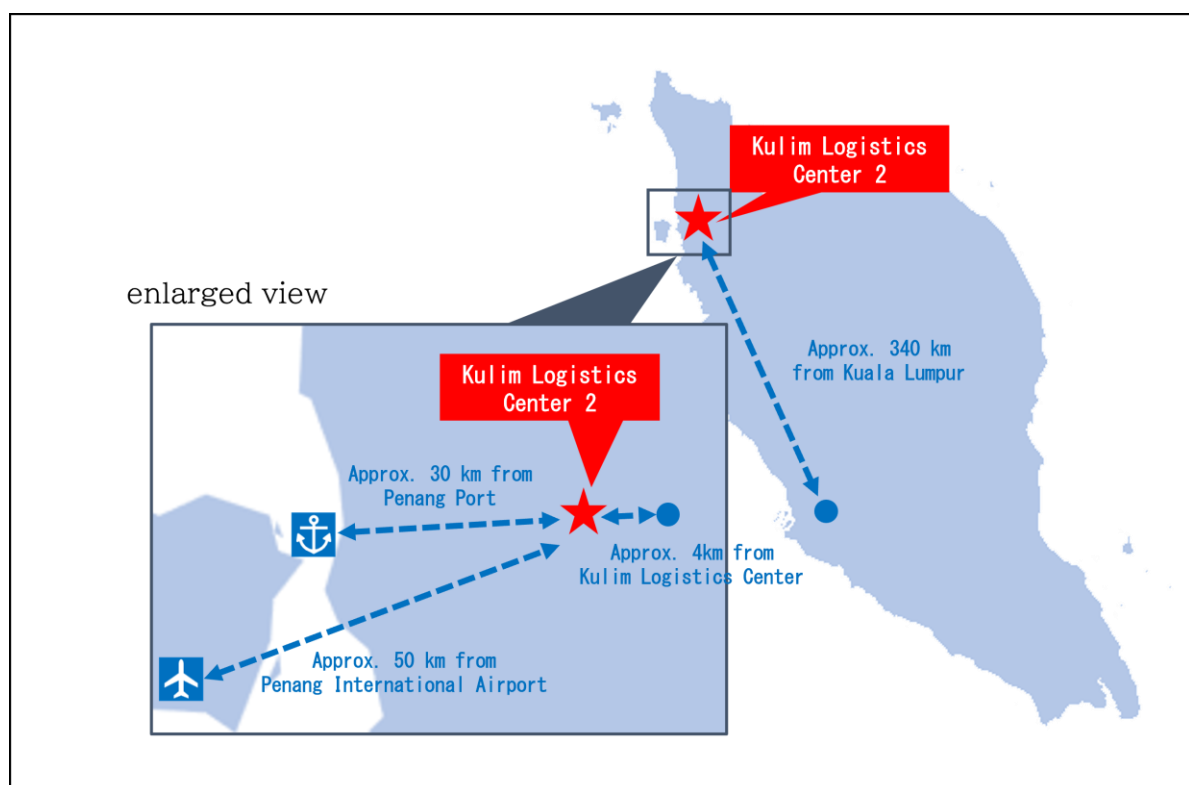

With the increasing demand for logistics in the Kulim area, driven by the booming semiconductor and medical device manufacturing industries, the establishment of the new warehouse aims to further strengthen logistics functions in the area.

We will leverage our location within the industrial park to offer services such as VMI (Vendor Managed Inventory) warehouse services and JIT (Just-In-Time) delivery services.

Facility Overview:
