Fuji Logistics Co., Ltd.

Start of Operations at Kulim Logistics Center 2, Malaysia

Our group company, Fuji Logistics Malaysia, has constructed a new warehouse, "Kulim Logistics Center 2," in the Kulim area of Kedah, Malaysia, and has commenced operations as of today.

Following our existing "Kulim Logistics Center," this marks our second company-owned warehouse in the Kulim area.

Leveraging a prime location with excellent access to major ports and airports, we will contribute to greater logistics efficiency for our customers.

As the only Japanese logistics company within the Kulim Hi-Tech Park, Fuji Logistics Malaysia has offered high-quality logistics services, primarily in the semiconductor sector, for over 10 years.

With the opening of our new warehouse, we will further utilize our experience, technology, and advantageous location to provide even higher quality logistics services, including VMI (Vendor Managed Inventory) warehouse services and JIT (Just-In-Time) delivery services.
